## PART 3 EXECUTION

### 3.1 EXAMINATION

- A. Do not begin installation until substrates have been properly prepared.
- B. Verify that prepared openings are sized and located in accordance with approved shop drawings. Verify that blocking, reinforcement and anchoring devices are the correct type, have been located correctly, and have been installed properly.
- C. If substrate preparation is the responsibility of another installer, notify Architect of unsatisfactory preparation before proceeding.

### 3.2 PREPARATION

- A. Provide templates and rough-in measurements as required.
- B. Prepare surfaces using the methods recommended by the manufacturer for achieving the best result for the substrate under the project conditions.

### 3.3 INSTALLATION

- A. Install in accordance with manufacturer's instructions.
- B. Install plumb, level and rigidly anchored to substrate.
- C. Locate accessories as indicated on the drawings and at heights that are in accordance with Americans with Disabilities Act.

### 3.4 CLEANING

- A. Clean surfaces as required, following procedures and employing cleaning materials as recommended by accessories manufacturer.
  - 1. Acceptable cleaning solutions:
    - a. Vinegar-water solutions (less than 5 percent vinegar)
    - b. Ammonia-water solutions (less than 5 percent ammonia based). Solution should not contain any alkali, as this will cause mirror spoilage
    - c. Alcohol based solutions (less than 5 percent ethyl, methyl or rubbing alcohol solution)
  - 2. Apply solution to a soft, clean microfiber cloth first to prevent spillover onto the mirror edges or back of the mirror to prevent premature mirror corrosion.

### 3.5 PROTECTION

- A. Protect installed products from damage by subsequent construction activities, until completion of project.
- B. Field repair of damaged product finishes is prohibited. Replace products that have been damaged by subsequent construction activities.
